Prepared by: Vancouver Coastal Health, Public Health Surveillance Unit, April 2016.

Data sources:

- Sexually transmitted and bloodborne disease data, with the exception of Hepatitis C, are provided by the BC Centre for Disease Control (BCCDC), extracted on March 28, 2016.
- Other disease data are provided by Vancouver Coastal Health, Public Health Surveillance Unit from the Primary Access Regional Information System (PARIS) and the integrated Public Health Information System (iPHIS) for Coastal Urban prior to January 11, 2011 and Coastal Rural prior to March 9, 2011. Data extracted on April 11, 2016.

Population source: BC STATS, BC Ministry of Labour and Citizens' Services, Population Estimates as of January 2016.

Notes:

*Communicable diseases without reported activity from 2010 to 2015 not included in this table are: anthrax, chancroid, diffuse lamellar keratitis, hemorrhagic fevers, paralytic shellfish poisoning (PSP), plague, poliomyelitis, Q fever, reye syndrome, severe acute respiratory syndrome (SARS), smallpox, tetanus and tularemia.

[†]Rate per 100,000 population.

[‡]This category captures cases with positive HBV markers with insufficient evidence to be classified; these are most likely carriers.

[§]Salmonellosis case counts do not include Paratyphoid Fever (*Salmonella paratyphi*) and Typhoid Fever (*Salmonella typhi*).

Note: Case counts may change over time due to lag in reporting or change in episode date.

Number of reported communicable diseases* and incidence rates[†] by HSDA.

Vancouver Coastal Health Authority, 2015.
