Why Choose Us:

Motion Specialties began in 1985 in Vancouver, providing comprehensive home health care and accessibility solutions for a wide variety of clients requiring complex rehabilitation equipment. Motion Specialties has evolved to become Canada's most technologically advanced home health care provider, with a store network of 32 locations in British Columbia, Alberta and Ontario.

The sales consultants that align themselves with Vancouver Coastal Health's GF Strong Rehabilitation Centre are the most experienced and knowledgeable people at our Vancouver location. These sales consultants work closely with the professional therapy staff at GF Strong in order to provide the prescribed mobility equipment for the end user, to allow complete access to the environment. Another key factor that sets Motion Specialties apart from its competitors is our ability to provide customized solutions for the most complex seating and positioning condition. We achieve this unique offering by having an in house seating technician that builds systems that are custom fit to the body.

Motion Specialties will provide the best rehab solution that is needed for you to move forward. We look forward to providing you with our product knowledge, equipment and services, thank you.
